

Feb. 18, 1928.

Mr. Columbus R. Hall,
Manti, Utah.

Dear Sir;

RE: BOWL CREEK.

I have your petition of Feb. 14 asking the appointment of Mr. E. S. Johnson as water commissioner on Bowl Creek.

This matter has been the subject of considerable discussion between the office and yourself and in the past I have several times pointed out the necessity of having some information as to what the required budget will be. The information that the proposed water commissioner will charge \$5.00 a day and mileage at 12 cents a mile means very little to me in absence of information as to how many days his services will be required and also the total entire mileage involved. Information in regard to this will be necessary before I can make an appointment.

Yours very truly,

State Engineer.
